

PHANTOM Management

by nekelone_

This module integrates the server's functions for managing and creating Phantoms and Friends, as well as specific functions such as buffs, weapon switching and cubics. To open the menu, type .phantom in the chat.

Everything is controlled through buttons and different sections, which are explained below.

Home Tab

Party Stance:

- > Hold: keeps the Phantoms standing still in place.
- > Assist: makes the Phantoms attack the target you currently have targeted.
- > Farm: makes the Phantoms farm freely on their own.
- > Follow: makes the Phantoms follow you without attacking on their own initiative.

Camp:

- > Set Camp: resets the camp and sets it at the position where you are standing. It leaves the party ready to work from that point; it does not select a puller by itself.
- > End Camp: ends the camp and releases the party from that mode.
- > Stop Pull: stops the pull function and leaves the puller with no active pull size.
- > Pull 1/2/3: defines how many mobs the puller tries to bring in each batch. The actual number may be lower depending on distance and pull conditions.

Party Control:

- > Buff Me: makes the Phantoms that have buffs, dances or songs apply them to you.
- > Buff All: makes the Phantoms that have buffs, dances or songs apply them to the party.
- > Recharge: orders an Elder to recharge the party member you have targeted.
- > Stop MP Up: stops any active MP recharge orders.
- > Heal: a healer casts a direct heal on the party member you have targeted.

- > Heal Full: keeps healing your target until they reach 100% HP, with a 60-second safety limit.
- > Loot: makes the collected loot be returned to the leader through the party loot function.
- > Stand All: keeps all Phantoms standing, preventing them from sitting to rest when low on MP.
- > Sit All: allows the Phantoms to sit down to recover MP and HP.
- > Cubics?: reports the active cubics of the Phantoms that can use them.
- > Weapons?: reports the active weapon of the Phantoms that have weapon switching.
- > Travel: lets you choose a destination to move the whole party along with you.
- > Disband: kicks all Phantoms out of the party.

Party Tab

List of all the Phantoms that make up the party.

- > Manage: opens the individual menu of each Phantom with the functions available to it.
- > Drop: kicks the selected Phantom out of the party.

Manage Menu

It shows the functions available for each Phantom according to its class.

Common to all: functions available to all Phantoms.

- > Assist: attacks the target you currently have targeted.
- > Farm: makes the Phantom farm freely on its own.
- > Hold: keeps the Phantom standing still in place.
- > Follow: makes the Phantom follow you without attacking on its own initiative.
- > Pull: selects the Phantom as the puller. Only available for Tanks and DPS; supports cannot be pullers.

Support: in addition to the common functions, it includes special sections for Bishop, Prophet, Shillien Elder, Elven Elder, Warcryer and Overlord.

- > Buff All: applies the Phantom's buffs to the party.
- > Buff Me: applies the Phantom's buffs only to you.
- > Heal Full: repeatedly heals your target until they reach 100% HP, with a 60-second safety limit. Available for Bishop, Prophet, Shillien Elder and Elven Elder.
- > Resurrect: attempts to resurrect the dead Phantoms in the party. Available for Bishop, Prophet, Shillien Elder and Elven Elder.
- > Recharge: fully recharges the MP of the party member you have targeted. Available for Shillien Elder and Elven Elder.
- > Stop MP Up: stops Recharge orders. Available for Shillien Elder and Elven Elder.
- > Bufs: full list of the available buffs, so you can manually choose the desired one.

Dancer: in addition to the common functions, it includes special sections for Blade Dancer.

- > Buff All: applies the dances to the party.
- > Dances: list of the available dances, so you can manually choose the desired one.

Singer: in addition to the common functions, it includes special sections for Sword Singer.

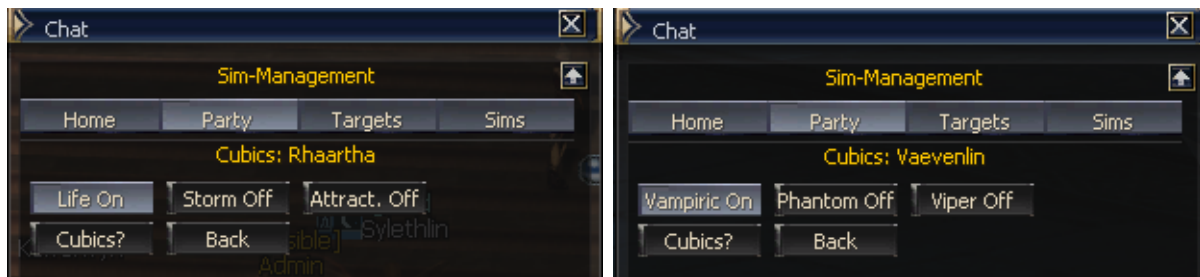

- > Buff All: applies the songs to the party.
- > Songs: list of the available songs, so you can manually choose the desired one.

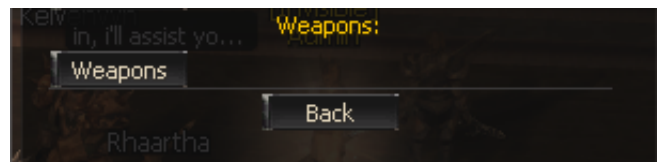

Cubics: in addition to the common functions, it includes special sections for Temple Knight and Shillien Knight.

- > Life On/Off: enables or disables the Life cubic when the class has it available.
- > Storm On/Off: enables or disables the Storm cubic when the class has it available.
- > Attractive On/Off: enables or disables the Attractive cubic when the class has it available.
- > Vampiric On/Off: enables or disables the Vampiric cubic when the class has it available.
- > Phantom On/Off: enables or disables the Phantom cubic when the class has it available.
- > Viper On/Off: enables or disables the Viper cubic when the class has it available.
- > Cubics?: reports the cubics that are currently active.

Weapons: in addition to the common functions, it includes special sections for Gladiator, Warlord, Destroyer, Bounty Hunter and Warsmith.

- > Polearm: switches the active weapon to the available polearm-type weapon.
- > Blunt: switches the active weapon to the available blunt-type weapon.
- > Switch Back: returns to the previous/main weapon.
- > Weapons?: reports the weapon that is currently active.

Note: the buttons and actions that appear in Manage depend on the Phantom's class; the interface hides the functions that do not apply.

Targets Tab:

Lets you control the whole party, especially in fights against raid bosses.

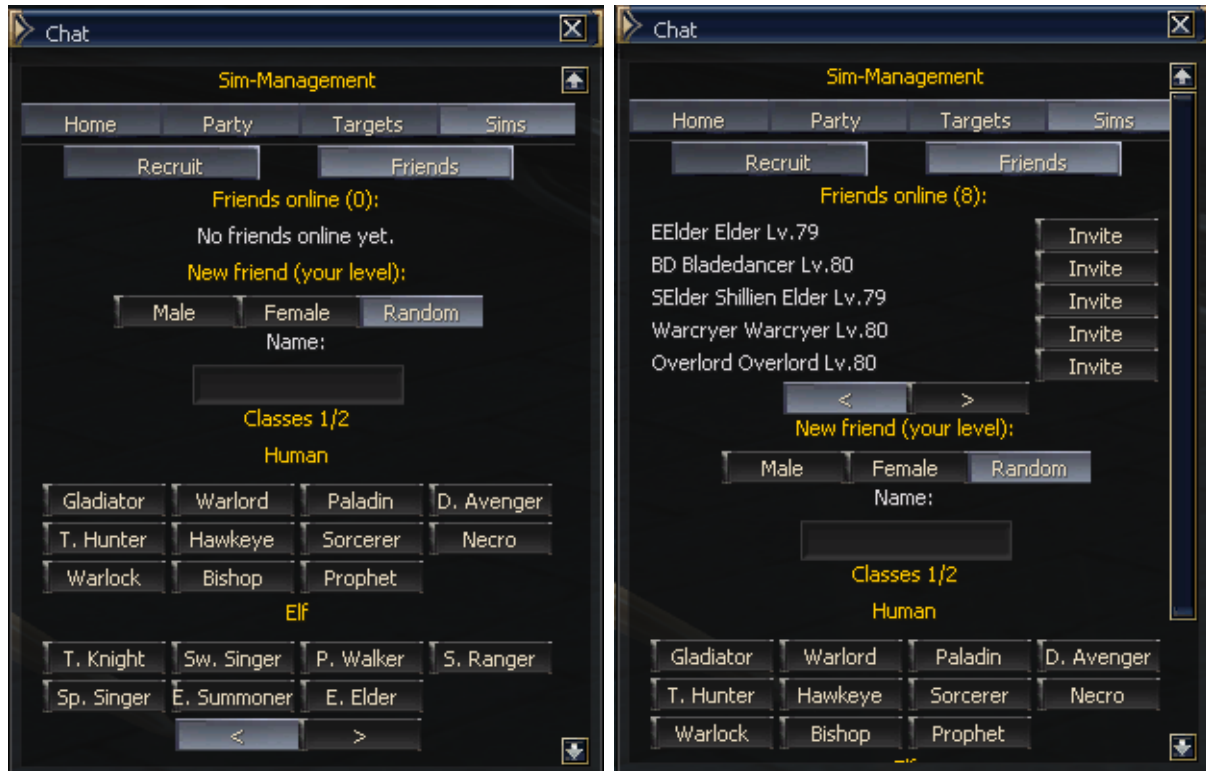

Your Target: shows the target you currently have targeted, along with its name, level and HP percentage.

Raid Gate: quick controls for combat against raids.

- > Tank Attack: orders the Tank to start the attack on the raid.
- > All Attack: orders all Phantoms to attack the target.
- > Tank Holds: keeps the Tanks and one healer active; stops the DPS, buffers and additional healers.
- > Stop Fight: stops the combat and clears the active raid order. The description must not promise that the party will automatically follow you.

Raid Orders: gathers several party orders adapted for control from Targets: Heal, Buff All, Resurrect, Recharge, Stop MP, Stand All, Sit All and Loot.

Phantoms Tab:

Menu Recruit: lets you recruit any of the 31 available classes, either by choosing the desired level beforehand or leaving it blank to use your own level. Once created, up to a maximum of 8 Phantoms can be available to invite from the *Waiting for your invite* section at the top.

Menu Friends: lets you create Friends by customizing gender, name and class. Friends are persistent on the server and can be invited again from the *Friends online* section at the top.
